EAST DALEY RESEARCH

■ Not an April Fools' Joke

- The Bonanza Creek Energy (BCEI) and HighPoint Resources (HPR) merger announced in Nov. 2020 closed April 1, combining BCEI's 70,000 net acres in the northeast Wattenburg play with HPR's ~143,000 net acres in the northeast Wattenburg and Hereford areas.
- HPR filed Chapter 11 bankruptcy on March 14, but it also brought a rig into the basin in late March, its first since April 2020.
- We see a similar story for BCEI; the company laid down its one rig in April 2020 but returned one rig to the basin in late February/early March 2021.
- According to East Daley's Production Allocation Model, both BCEI and HPR send volumes to DCP Midstream (DCP)'s DJ system, with BCEI gas volumes averaging 44 MMcf/d and HPR's 68 MMcf/d. HPR also sends volumes to Summit Midstream's (SMLP) Hereford plant (9 MMcf/d).
- While the newly "embiggened" operator has not released production or rig guidance for 2021 as of publication, BCEI averaged 1.2 rigs in 2018-19 with a maximum of 2 rigs in late 2Q18 to early 3Q18. In that same time, HPR averaged 2.7 rigs, with a peak five rigs operating from late 4Q18 to 1Q19.

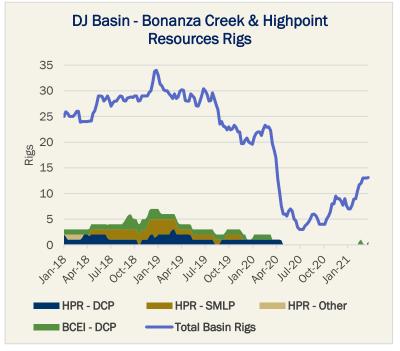

Figure 1: Bonanza Creek Energy and HighPoint Resources DJ Basin Rigs (East Daley Midstream Activity Tracker, Production Allocation Tool)

- SMLP guidance indicates little to no activity is expected on its Hereford system this year, meaning activity from the newly combined operator will likely focus on the NE Wattenburg acreage. Heritage HPR acreage offsets BCEI acreage in the NE Wattenburg, creating a position optimized for field development.
- East Daley's March DJ Production Constraint Forecast predicts the DJ Basin will hit 17 horizontal rigs this summer, before slowly falling off as WTI futures trend downward. A rig or two from the newly merged BCEI could be part of that upswing, adding potential benefits to DCP.
- o DCP's DJ system currently only has two rigs operating: HPR and PDC Energy (PDCE), the latter of which guided to only one rig operating in the DJ this year. Melissa J. Saurborn *Tickers: BCEI, DCP, HPR, PDCE, SMLP.*

■ East Daley Joins RBN in New Webinar

- East Daley will join RBN Energy for a live webinar Thursday, April 8 reviewing a recent Spotlight report on TC Energy (TRP) jointly published by our two organizations. Register for Thursday's webinar through RBN here.
- These Spotlight reports and new Spotlight Live Sessions are a joint venture from RBN Energy and East Daley Capital, where we take a deep dive into the fundamentals of one midstream company in each edition. This month we focused on TRP; contact <u>sales@eastdaley.com</u> to request access.
- This week's (4/8/21) Spotlight Live Session is available to RBN Backstage Pass Members. The event should run for roughly 30 minutes and will feature East Daley Capital Markets Analyst Zack Van Everen.
- The webinar will focus on TRP's assets, strategy, and financials. Van Everen and RBN analysts will discuss major impacts of the Keystone XL pipeline's cancellation, and other TRP operations.
- Click here to register for Thursday's joint webinar. Tickers: TRP.

East Daley to Release Redesigned 1Q21 Earnings Previews

East Daley in the coming weeks will release to clients our newly updated 1Q21 Earnings Previews for the 26

midstream energy companies within our

- East Daley's Earnings Previews (formerly known as Board Reports) provide a highlevel overview of expected quarterly performance by midstream company.
- Following actual reporting of companies' 1Q21 earnings, we will publish Earnings Reviews reviewing company results and comparing our forecast to performance.
- We will publish our first Earnings Preview on Kinder Morgan (KMI) later this week ahead of KMI's 1Q21 earnings report, and subsequent batches of Earnings Previews each week this month.
- Our Earnings Previews include predictions for Adj. EBITDA by segment, the outlook on major projects, near- and long-term risks to future earnings, and a full rundown of financials for our midstream coverage.
- We have redesigned our Earnings Previews to simplify the look and maximize their value to our clients in an easily digestible format. We still deliver the same expert midstream analysis to keep clients one step ahead of industry trends.
- We will also host a pair of webinars coordinated with the release of our Earnings Previews and Earnings Reviews, in which our analysts will take a deep dive into a handful of company earnings forecasts that we have high conviction.
- To request access to past earnings webinar discussions, or to RSVP for our upcoming events, please contact sales@eastdaley.com.

Figure 1Segment EBITDA

1Q2021EarnIngFreviewEast Daley forecasts DCPs 1Q21 Adj. EBITDA of \$ABC million, up \$XYZ QoQ and \$ABC million above consensus. We are XX% higher than the Street, likely on improved pricing across gas, natural gas liquids (NGLs), and crude Q-o-Q. DCP's percent-of-proceeds (POP) contracts in the Permian, DJ, and Anadarko provide upside.

- KeyData,Risk& Asset(1Q21): up 2% Q-Q-V while sample volumes in the Permian are down 3% and DCPs Delaware systems are up 2% DCPs Midland gas sample is not a reliable indicator of plant flows during the quarter because much of its plant tailgate volumes interconnect with intrastate pipeline
- takeaway.

 NGL and gas prices are up significantly Q-o-Q, driving the quarterly earnings increase. Henry Hub gas is up XY2%, the weighted average NGL price per gallon is up 7%, and WIT crude is up 4%. Deep commodify-exposed G&P contracts should benefit from the increase in gas and NGL prices.

 In DCP's L&M segment, there is potentially more downside on Southern Hills liven the decribe in the fize seroad (westered NGL).
- Southern Hills given the decline in the frac spread (weakened NGL prices relative to gas prices), which incentivizes ethane rejection, leaving fewer NGL gallons available for transport on the NGL pipeline.

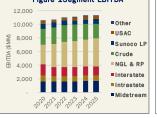

KeyData,Risks& Assets(LongTerm:)

- Grand Prix, owned by Targa, will offset Permian NGL growth . TRGP is an anchor shipper on Sand Hills but its committed yournes there will roll off beginning in 2024, creating risk for Sand Hills as TRGP migrates NGLs to its own pipeline.

 Guadalupe: East Daley forecasts a \$XYZ million decline in earnings
- from 2020 to 2024 because the arbitrage opportunity from the Permian to South Texas will continue to erode from new natural gas egress capacity coming online.

eeof FCF / Strategy
EBITDA outlookee East Daley's 1Q21 Earnings Previews for more information on DCP's EBITDA outlook.

StrategySee East Daley's 1Q21 *Earnings Previews* for more information on DCP's Strategy.
